

Sending Attachments with Outgoing Yahoo! Mail Classic Messages

You can send all types of files as attachments, including word processing or spreadsheet documents, audio files, image files (such as .bmp, .jpg, .gif), web pages saved as HTML files and more.

1. After logging into your Yahoo!Mail Classic, click on the Compose button

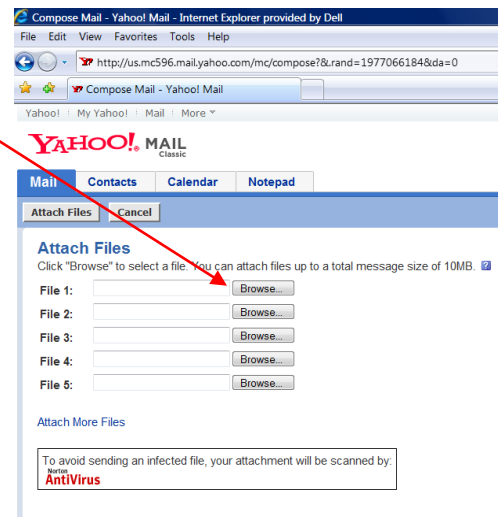

2. This will open the Compose Mail window. Click the Attach Files button

3. This pop-up box may appear, if it does, click OK.

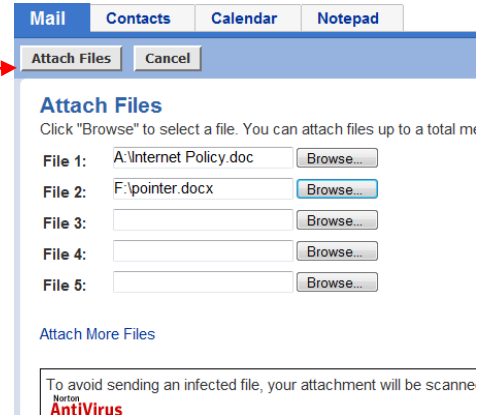

4. The attach file page will open. Click the Browse button.

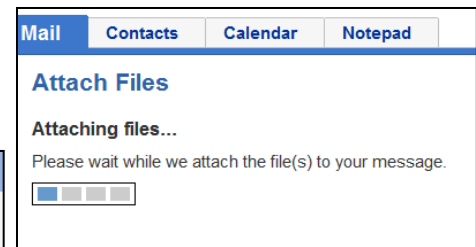

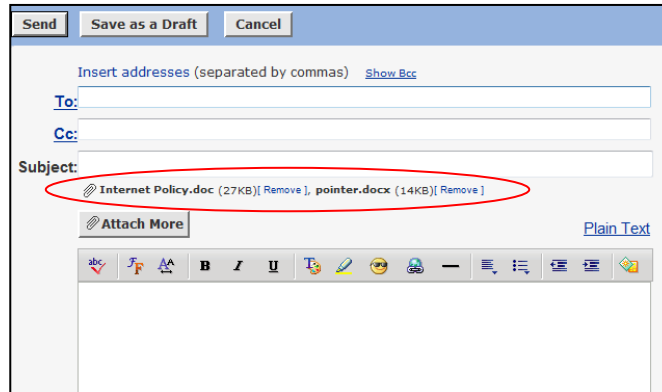

5. A Choose File dialog box will appear. Navigate to your flash drive or drive that contains the file you want to attach and locate the file. Click once on the file and click the Open button. The selected file and its location appear in the first attachment field. To attach more files, click the next Browse button and repeat the above steps.

Sending Attachments with Outgoing Yahoo! Mail Classic Messages

- When all the files you want to send are listed, click the Attach Files button.

- Progress bars will display while the files are being attached and when the process is complete, you will see your files listed on the Compose window.

- You can then address, compose and send your message.
